What can a Drug-Free Workplace do for your Company?

Save you Money! A well-trained and educated workforce is known to produce better results. Through education, the program helps to minimize both medical and workers' compensation insurance costs: **Reduce Claims, Reduce Costs!** Furthermore, as you train your employees, you increase the level of protection from both internal and external forces.

Save time and money by investing in PREVENTION vs. INTERVENTION!

The DTN Training Advantage:

DTN Training provides interactive training for supervisors and employees as required by the latest federal government rules and regulations regarding drug and alcohol testing.

Meet your DOT Training requirements or comply with the Drug-Free Workplace Program guidelines. This unique product is one of a kind in this specialized field.

Supervisor Training Module specifically instructs supervisors to identify, document and address employee performance issues that could be an indication of drug and alcohol related problems. The result is a safe and productive workplace.

Our modules provide training for your entire workforce with:

- **Flexibility:** Supervisors and employees can train on a time frame that works for them. Just log onto the Web and complete training when it is convenient for them.
- **Full Federal Compliance:** DTN Training will keep you and your office 100% compliant with training requirements mandated by the Department of Transportation, the Department of Energy and other federal agencies. Full student completion record reporting is included.
- **Comprehension:** Unlike a video or textbook, the DTN interactive training modules involve active participation from the student. Answer input is required before the training will advance from one section to the next. Studies show that this teaching method is one of the most effective forms of training available today.

DTN Training is a fast and hassle-free way to educate your employees on substance abuse prevention in the workplace. **It is also economical:**

Supervisor Training	
Quantity range	Price per
1 to 10	\$55
